

CUSTOMER:	CHINA OFFSHORE OIL (SINGAPORE) INT. PTE LTD / CNOOC TRADING (SINGAPORE) PTE LTD
VESSEL:	VLCC FRONT DEE
VOYAGE:	FDEEXX002
PRODUCT:	BUZIOS C.O.
TERMINAL:	T-OIL TERMINAL / PORTO DO AÇU
CARGO REF:	P74 OC 011
DATE:	April 10th to 11th, 2024
PETROINSPEC REF:	PIS003/24

Dear Customer:

Please find enclosed our Survey Report for the above referenced vessel.

Thanks and best regards,

CUSTOMER: CHINA OFFSHORE OIL (SINGAPORE) INT. PTE LTD / CNOOC TRADING (SINGAPORE) PTE LTD

VESEL: VLCC FRONT DEE
VOYAGE: FDEEXX002
PRODUCT: BUZIOS C.O.

TERMINAL: T-OIL TERMINAL / PORTO DO AÇU
CARGO REF: P74 OC 011
DATE: April 10th to 11th, 2024

Attention: CAPTAIN/CHIEF OFFICER
Confirmation of receipt of all related cargo documents by signing this certificate

DOCUMENTS	STATUS
MASTER RECEIPT OF DOCUMENTS	Yes
VESSEL CARGO ORDERS	Yes
SUMMARY OF QUANTITIES	Yes
SHIP'S FIGURES BY TABLE ASTM 60A	Yes
SHIP'S FIGURES BY TABLE ASTM 6A	Yes
VESSEL EXPERIENCE FACTOR	Yes

To :

Dear Sir,

We have been appointed as surveyors on the above mentioned vessel by our principals CHINA OFFSHORE OIL (SINGAPORE) INT. PTE LTD / CNOOC TRADING (SINGAPORE) PTE LTD. Acting for and on their behalf, we do hereby note protest with you concerning the following situation:

COMPARISON BETWEEN TOTAL QUANTITY RECEIVED ON VESSEL AND DELIVERED BY FPSO AS PER ASTM 60A TABLE:

DPST DELIVERED FIGURES: 76.018,953 m³ @20°C° NSV

VESSEL'S LOADED FIGURES: 76.195,715 m³ @20°C° NSV

> DIFFERENCE: 176,762 m³ @20°C or 0,23 % RECEIVED ON VESSEL.

We hereby reserve the right of our principals to refer to this matter at a later date and to take such action as may be deemed necessary.

Yours Faithfully

To :			

Dear Sir,

We have been appointed as surveyors on the above mentioned vessel by our principals CHINA OFFSHORE OIL (SINGAPORE) INT. PTE LTD / CNOOC TRADING (SINGAPORE) PTE LTD. Acting for and on their behalf, we do hereby note protest with you concerning the following situation:
It was found a total amount of 139,55 m³ of free water in the ship's cargo tanks.

We hereby reserve the right of our principals to refer to this matter at a later date and to take such action as may be deemed necessary.

Yours Faithfully

CUSTOMER: CHINA OFFSHORE OIL (SINGAPORE) INT. PTE LTD / CNOOC TRADING (SINGAPORE) PTE LTD

As per the Master/Chief Officer of the aforementioned vessel, the cargo tanks on deck below are pressurized with gas, preventing physical entry. Consequently, our assessment was confined to a visual inspection. The onboard tanks were examined visually, adhering to the criteria of cleanliness, dryness, and absence of odors.

Informed method that have been used to clean the tanks:

The tanks on the ship were inspected using sounding, as visual checks were impracticable due to the presence of inert gas inside

[illegible]

Information regarding previous cargoes, tank coating, and cleaning methods was obtained from vessel personnel and cannot be guaranteed as accurate. PetroInspec assumes no liability for any consequences resulting from inaccurate information supplied by the vessel. This report necessarily relies on such information.

The tank cleaning inspections are based on visual assessments of accessible surfaces and system time. However, this document does not encompass the evaluation of tank surfaces' cleanliness, specific spots, or the potential release of components from previous cargoes during loading, discharging, or transport of the current cargo. The vessel holds full responsibility for these aspects. The assurance of the suitability of tank coating for the intended cargo must be guaranteed by the vessel's owner or the coating suppliers.

Due to the difficulties and limitations inherent within closed system sampling, as described in API MPMS Chapter 17.11, Petrolspec can not attest to the representative nature of samples drawn with such systems or the test data derived therefrom as contained within this Test Report.
